RUFFSAWN

Ruff Sawn specializes in handcrafted solid wood furniture, yet it is more than just furniture to us. It is our passion! With over 24 years of experience in the industry, two locations based in Ontario, Canada and two situated in the United States, we administer an efficient production and distribution network advantage across North America.

Our Ruff Sawn upscale styles are skillfully designed with form, fashion and function in mind. Our clean lines and organic textures represent the hallmarks for which we are widely known.

All our products cannot be easily reproduced due to the use of our unique tools and methods! Our furniture is individually bench built by a community of North American skilled artisans, who rely on time honoured techniques combined with technology and precision to ensure our furniture is crafted with the utmost care.

Ruff Sawn – solid wood furniture you can feel good about.

Wood Source

We offer domestic woods, which fare well with age and use. Our wood has been air-dried, then kiln-dried to remove moisture.

Our Construction

Ruff Sawn incorporates the use of timeless techniques such as mortise and tenon when handcrafting furniture. Our drawers are English Dovetail construction and available with full extension side mount or soft close under-mount slides. Each drawer is completed by boasting a rich finished interior.

The top, sides, front and bottom of our furniture are comprised of solid wood; in fact, most of our collections have heavier tops - up to 8 quarter thickness (2"). To fortify further we construct durable face frames and attach our back panels with screws, to help ensure lateral stability.

A superior stain enhances the natural beauty and longevity of solid wood furniture. Therefore, we use high - quality conversion varnish based on its incredible durability and resilience. At Ruff Sawn we believe exceptional quality should be the standard.

Furniture Alterations

Ruff Sawn offers the end user an option to alter our pre-existing collections. With access to our platform of over 3000 SKU's, the potential is limitless! We eliminate the frustration of sourcing designs that do not meet all the user's requirements functionally and aesthetically. Our innovative and seamless approach provides purveyors and clients with access to our Ruff Sawn Design Team, to assist in every step of the creative development process. Customization is a simple 4 step process:

- Select collection
- Add or delete details
- Create new dimensions
- Choose Stain

Quick Ship

Due to sizeable growth in our production capacity, Ruff Sawn is offering quick ship items! These collections are featured with standardized dimensions and hardware, attainable in 11 standard color options. Additional color options add 10% and for glazed finishes add 20%. To get started, connect with your sales representative for Quick Ship Programs and general inquiries today!

Our finishes are applied to solid wood materials. A customer can expect 15% variation in color. Please note: stain does not conceal the natural variations in texture and the color of the wood. This is considered to be normal and not a defect. Colors can fluctuate due to color lot and season.

RUFFSAWN

RUFF SAWN PROVIDES A LIMITED WARRANTY:

For a period of 1 year from date of manufacture against any manufacturing defects to the original purchaser.

Ruff Sawm will repair or replace any defective components or hardware, at its discretion, provided the item is returned or shipped freight prepaid to and from our warehouse.

All dealers and/or customers are responsible for inspecting product before shipping to final destination. We do not cover excessive repair charges due to long distance travel for repair.

If the repair can be performed on site by an Authorized Retailer, Ruff Sawm will supply any necessary parts.

This warranty does not cover shipping damage by third party carriers, or furniture that has been misused, or damage resulting from negligence, rental or commercial use, improper cleaning, damage or wear to swivel mechanisms, exposure to extremes in temperature or humidity, alterations in the product or unauthorized repair. To file repair claims contact us for additional policies and procedures.

This warranty is not transferable.

In keeping with our continuous refinement policy, we reserve the right to alter specifications and styles without general notice, or obligation to make similar changes in products previously ordered or produced.

THE NATURE OF SOLID WOOD:

Finishing materials will not conceal natural variation in color and grain pattern, thus an exact color or grain match is not guaranteed. Each piece of furniture is unique and will reflect its own character and color which are signs of the genuineness of our solid wood products and are not defects. Solid wood is also affected by humidity and will shrink or swell according to humidity level. These changes will affect drawer and door fit as well as gaps in table tops. This is not a defect but reflects the nature of solid wood.

HOW TO CARE FOR YOUR FURNITURE:

For daily dusting of our furniture, simply use a damp cloth (Microfiber if possible) and wipe dry with a similar soft cloth.

If a deep clean is required use a product like Murphy's Oil Soap, or something similar, diluted in warm water, wiping with the grain and drying again with a soft cloth.

Do not use any spray polishes (such as Pledge) or waxes on our solid wood furniture as these may damage the finish.

Clean up spills immediately with a blotting motion rather than a wiping motion.

Do not place anything hot directly on our solid wood furniture.

Use insulated pads under anything warm, including pizza boxes.

Avoid placing any of our furniture in direct sunlight or over heat registers, which can cause fading, drying and cracking.

Avoid extreme changes in humidity. Too high or too low humidity can cause wood to warp or the glue used in construction to loosen.

During winter months use a humidifier in your home to maintain humidity levels at approximately 40-45% relative humidity.

If you want to move your furniture, lift it, don't drag it.

Do not use plastic or rubber place mats or table covers on wood finishes. They may react with the finish and adhere to the surface.
